

FREE

no cost to participating schools.
Consumable and returnable robotic kits will be provided by the Connecticut BEST Robotics Hub. Student teams design and build their own robots to meet our challenge!

This year's theme is

HIGH SCHOOL OCTAN

Kick Off Day September 19
Game Day November 1

Benefits to Students. Increases understanding of technical concepts and scientific principles. Provides real-world engineering and business management concepts with complex scenarios over several periods. Encourages abstract thought, critical thinking, and problem solving. Promotes teamwork, good sportsmanship, leadership, and entrepreneurship.

Our Mission is to inspire students to pursue careers in engineering, science, and technology, and math through a sports-like science- and technology-based robotic competition.
